Introduction

Welcome to *HTML Cipher v1.0*! Thank you for downloading this program.

JavaScript Utility Suite is a application that consists out of five utilities:

* **Dropdown Menu Maker** to make dropdown menus;
* **Popup Maker** to make popup windows;
* **MouseOver Button Maker** to make JavaScript rollovers;
* **Slideshow Maker** to make advanced HTML slideshows;
* **JS Editor** to edit and make JavaScripts.

These utilities are often found only in commercial software. These utilities make the generation of complex code very easy, by the user only having to fill in some fields.

The code is then generated quickly and can easily be saved or inserted in pages that exist already.

No programming or HTML knowledge is needed!

This program is freeware. It is also copyrighted, so for distribution purposes please see Contact and Copyright.

We hope you enjoy this program and use it wisely to your benefit within copyright restrictions. If you have any comments or suggestions, do not hesitate to contact us by e-mail.

Dark Street™ Development also make other utilities helping webmasters around the world. Visit the site for more information.

ENJOY!
